Reasons for Allowance

Allowable Subject Matter

1. The following is a statement of reasons for the indication of allowable subject matter: The prior art of record fails to teach a press that outputs an elongated workpiece in a direction, a withdrawing device comprising: a first guide extending in the direction; a first carriage displaceable in the direction along the first guide, first motor means for displacing the first carriage in the direction along the first guide; a second guide extending in the direction on the first carriage; a second carriage displaceable in the direction on the second guide, whereby the second carriage can move relative to the first carriage; means for clamping the workpiece to the second carriage; second motor means separate from the first motor means for displacing the second carriage on the second guide; and control means connected to the first motor means and to the second motor means for shifting the second carriage in the direction at a speed independent of a speed of the first carriage while the first carriage is moving in the direction.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Claims 12-21 have invoked means plus function pursuant to 35 U.S.C. 112, sixth paragraph. Where means plus function language is used to define the characteristics of

a machine or manufacture invention, claim limitations must be interpreted to read on only the structures or materials disclosed in the specification and "equivalents thereof." (Two en banc decisions of the Federal Circuit have made clear that the Office is to interpret means plus function language according to 35 U.S.C. 112, sixth paragraph. In the first, *In re Donaldson*, 16 F.3d 1189, 1193, 29 USPQ2d 1845, 1848 (Fed. Cir. 1994), the court held:

The plain and unambiguous meaning of paragraph six is that one construing means-plus-function language in a claim must look to the specification and interpret that language in light of the corresponding structure, material, or acts described therein, and equivalents thereof, to the extent that the specification provides such disclosure.

In this case, the first and second motor means, control means, and means for clamping have all invoked means plus function and thereby Examiner will interpret the structure as disclosed in the specification.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ukronpina (1961261), Okada (3829273), Boggs (2997737), Holden (3946483), Schafer (2994919), Yamamoto (4358264).
